- The camera must give your opponent a clear darts board picture and a good sound as well.
- Players must position the camera so that their dartsboard is fully visible , a camera from afar is not enough because the opponent must see the board at all times. - When it comes to setting up a camera, be creative and find the best way in your environment to do it (people use many different things... stood for the microphone....)
- Please give your opponent decent playing conditions and not make too much noise in your area while playing.
